DETAILED ACTION

1. The amendment filed 10/27/2003 is acknowledged and entered into the record.
2. Claims 1-7 and 13-51 are canceled.
3. Claims 8-12 are pending and examined on the merits.

Claim Rejections Maintained - 35 USC § 112, 2nd paragraph

4. The rejection of claims 8-12 under 35 USC 112, 2nd paragraph as being indefinite is maintained for the reasons of record. Applicant argues that the specification provides clear indication the term "RRP" is intended to refer to a Rhomboid Related Protein. Moreover, applicant states that because the RRP's are characterized in the specification by sequence identification numbers, there is clear indication to one of skill in the art that RRP is intended to refer only to Rhomboid Related Proteins. Applicant's arguments have been carefully considered but are not found persuasive because others, as evidenced by Salvo *et al* and Barg *et al*, have also defined RRP's. Because the skilled artisan cannot determine which "RRP" is intended to be encompassed with the scope of the claims, and because there are other names or meanings for the term "RRP", it is ambiguous and indefinite. As such, there is no clear distinction as to which RRP is being claimed by the applicant.

Claim Rejections - 35 USC § 112, 1st paragraph

5. The rejection of claims 8-12 under 35 USC 112, 1st paragraph as lacking proper written description for all RRP's is maintained for the reasons of record. Applicant

Art Unit: 1642

argues that the amendment to the claims to refer specifically to RRP1-8 and mouse RRP1 overcomes the rejection of record. Applicant's arguments have been carefully considered but are not found persuasive. In order to fulfill the requirements of written description, the specification as originally filed must convey to one of skill in the art the applicant was in possession of the instantly claimed invention. As provided in the last office action, other have discovered or characterized RRP proteins such as Szakmary *et al* and Savino *et al*, both of which specifically characterized a RRP1 protein. It does not appear that the specification has described a RRP protein with the same characteristics and as such is not entitled to the broad scope of RRP, especially RRP-1. There has been no structurally defined characteristics associated with the RRP so that one of skill in the art would be able to practice the invention commensurate in scope to the claims. The Guidelines for the Examination of Patent Applications Under the 35 U.S.C. 112, ¶ 1 "Written Description" Requirement make clear that the written description requirement for a claimed genus may be satisfied through sufficient description of a representative number of species by actual reduction to practice, reduction to drawings, or by disclosure of relevant, identifying characteristics, i.e., structure or other physical and or chemical properties, by functional characteristics coupled with a known or disclosed correlation between function and structure, or by a combination of such identifying characteristics, sufficient to show the applicant was in possession of the genus (Federal Register, Vol. 66, No. 4, pages 1099-1111, Friday January 5, 2001, see especially page 1106 3rd column).

Applicant was not in possession of the instant claimed invention. See Regents of the University of California v. Eli Lilly and Co. 119 F.3d 1559, 43 USPQ2d 1398 (Fed. Cir. 1997). Adequate written description of genetic material “requires a precise definition, such as by structure, formula, chemical name, or physical properties,’ not a mere wish or plan for obtaining the claimed chemical invention.” Id. 43 USPQ2d at 1404 (quoting Fiers, 984 F.2d at 1171, 25 USPQ2d at 1606). The disclosure must allow one skilled in the art to visualize or recognize the identity of the subject matter of the claim. Id. 43 USPQ2d at 1406. A description of what the genetic material does, rather than of what it is, does not suffice. Id.

Conclusion

6. **No claim is allowed.**

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
